

Traceability to Plantations

Sources of fresh fruit bunches (FFB) supplied to the mills which in turn supply Crude Palm Oil (CPO) to us are made up of:

- I. Estates – estates owned by the mills and third-party estates
- II. Smallholders – supplies FFB directly to our supplying mills
- III. Dealers – who source FFB from various origins

In 2021, 9.09% of our supplying mills sourced FFB from their own plantations while 25.00% of mills sourced FFB from third party plantations. Remaining 65.91% of mill sourced from both own and third party plantations. Third party plantation refers to various sources such as independent plantations, smallholders and dealers.

In terms of volume of FFB traceable, 34.93% was sourced from mill's own plantation and 15.07% from third party plantations.

Pacific Oils & Fats Industries Sdn Bhd's traceability to plantation for CPO in 2021 is 50.00%, and we consider the source of FFB as traceable when the following information is provided by the supplying mills.

FFB Sources	Information Required
Estates (>40.46 Ha)	<ul style="list-style-type: none"> • Estate name, • Parent company • GPS coordinates • Size of plantation • FFB volume (%)
Smallholders (≤40.46 Ha)	<ul style="list-style-type: none"> • Smallholder's name • Address • GPS coordinates • Size of plantation • FFB volume (%)
Dealers	<ul style="list-style-type: none"> • Dealer's name • Name of estates and/or/smallholders • GPS coordinates • Size of plantation • FB volume (%)
